**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, wherein A = aryl (includes napthyl and benzodioxolyl).
- II. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, wherein A = benzoxazine or phenoxazine.
- III. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, wherein A = pyridine.
- IV. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, wherein A = indole.
- V. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, wherein A = benzothiazine or phenothiazine.
- VI. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, wherein A = quinazoline.
- VII. Claims 2-6 and 12, drawn to compounds of the general formula (I) and simple compositions thereof, not embraced by groups I-VI.

- VIII. Claims 7 and 8, drawn to a method of treating various diseases using compounds in groups I-VII (applicant must elect one group).
- IX. Claim 9, drawn to a medicine for treating various diseases using compounds in groups I-VII (applicant must elect one group).
- X. Claim 11, drawn to a process of preparing compounds in groups I-VII (applicant must elect one group).

**Note: Election of a single disclosed chemical specie is required for any group elected. Furthermore, a single disclosed disease is required for group VIII if elected.**

**In addition, claim 10 is a non-statutory use claim and has not been considered. Cancellation of this claim is recommended.**

The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Document WO 00/04011 (mentioned in ISR), discloses general formula I wherein R<sup>2</sup> or R<sup>3</sup> may be (C<sub>6</sub>-C<sub>10</sub>)aryl (C<sub>1</sub>-C<sub>7</sub>)alkyl, wherein the aryl group may be unsubstituted (see page 3, lines 28-29). This overlaps in scope with claim 1 of the instant application, thus rendering said claim obvious. Therefore, the compounds and methods are not novel and the invention lacks a special technical feature.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.**

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are

subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
